1.0 OVERVIEW

1.1 Introduction

The disclosures set out herein have been provided in accordance with articles 46-53 of Part 6 of the Investment Firms Regulation (IFR - Regulation (EU) 2019/2033 of the European Parliament and Council). The purpose of these disclosures is to provide transparency to investors and the wider market.

In accordance with the requirements of the IFR, this document is intended to disclose information relating to Instinet Germany GmbH's risk management objectives and policies, governance arrangements, level of own funds, own funds requirements, remuneration policies and practices and, to the extent they are relevant its investment policy and its exposure to environmental, social and governance risk. Information is disclosed by IGG under these rules, unless it does not apply, or is considered by the Board as being proprietary or confidential information (note: no disclosures have been omitted on these grounds).

1.2 Scope and Frequency of Disclosure

Disclosures are made in respect of all Instinet Germany GmbH (IGG or the Firm), as at the document's reference date, 31 March 2023.

In accordance with the requirements of the IFR disclosures will be made at least on an annual basis and published on the parent Group's corporate website (https://www.instinet.com/legal-regulatory).

2.0 CORPORATE STRUCTURE AND BUSINESS OVERVIEW

2.1 Company Information

IGG was incorporated on 8 January 2018 in the Federal Republic of Germany. It has a licence to operate as an investment firm provided by the Federal Financial Services Authority (Bundesanstalt für Finanzdienstleistungsaufsicht - BaFin) as a licenced entity in Germany.

IGG is based in Frankfurt and has a branch in Paris that is regulated by the Autorité des marchés financiers (AMF). As at 31 March 2023, IGG employed two Managing Directors and 16 staff; the numbers of staff employed was as follows:

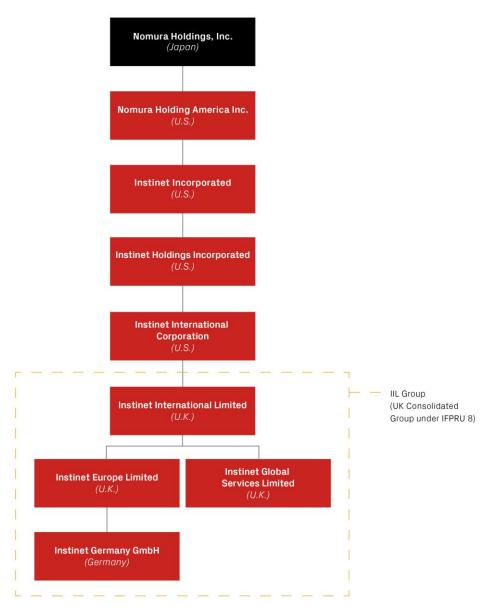

| Branch | Headcount |
|-----------|-----------|
| Frankfurt | 6 |
| Paris | 10 |

Table 2.1.1 - IGG Headcount

The Firm is part of the global Instinet group which itself is the independent equity trading arm of the Nomura Group. IGG's purpose is to undertake regulated investment business within the EEA, facilitating sales to the local client base. IGG is a wholly owned subsidiary of Instinet Europe Limited (IEL) and investment Firm which is authorised and regulated in the United Kingdom.

The Instinet Group structure is illustrated in the diagram below.

^{*}Ownership is 100% unless otherwise indicated.

IGG has permission to provide the following investment and ancillary services (in relation to cash equity products) and has passporting rights to provide these services throughout the EEA:

- Reception and transmission of orders in relation to one or more financial instruments;
 and
- Execution of orders on behalf of clients.

2.2 Business Model

Instinet is a global "agency broker" offering institutional clients and market counterparties access to multiple global execution venues through its subsidiaries around the world, via high touch trader worked equity orders and low touch direct client access to electronic trading and algorithms. The Instinet Group provides "agency" trading services, including algorithms, crossing networks, agency sales trading, global portfolio trading and commission management services, as well as access to third-party research.

IGG operates as an "agency brokerage" and, from a regulatory and reporting standpoint, its business is classified as "Riskless Principal". Trading arrangements on European markets are structured such that, whilst it only ever undertakes client business, taking no proprietary positions, the Firm is still required to deal as principal on the market in order to effect client order execution. As such, when executing trades on European markets, IGG is required to buy/sell to the market in a principal capacity and then sell/buy to the client in a principal capacity. Consequently, it will take "positions arising from client servicing" (albeit on a riskless principal basis as the market side and client-side transactions are matched/back-to-backed).

2.3 Business Environment

IGG operates in a highly regulated business environment with significant requirements in respect of transaction, financial and regulatory reporting, conduct, risk management and customer service. It is subject to regulations that constantly evolve in response to periods of financial instability, new business practices and economic and political developments and which are becoming more stringent over time in order to promote good practice and stability in the global financial markets.

2.4 Diversity

IGG, and more widely Instinet and Nomura, continue to focus on all aspects of diversity and inclusion. We are committed to creating an inclusive culture that values the difference in our colleagues and creates an environment where all employees are heard and valued. The Firm upholds Instinet's five pillars (the 5 As) of diversity and inclusion:

- Leadership Commitment & Management Accountability;
- Attraction of Talent from Diverse Backgrounds & Experiences;
- Advancement of our People through promotion & mobility opportunities;
- Raising Awareness about topics related to Diversity to increase honest and open dialogues;
- Leveraging Awards and Recognition opportunities to acknowledge the work our firm and people do daily to enhance our Culture.

To further our commitment to inclusion, diversity & belonging, IGG subscribes to the Group's Inclusion Recognition Program. This program aims to increase awareness, engagement and involvement across all aspects of Instinet's diversity & inclusion agenda, inclusive of inclusion networks, Community Affairs opportunities, health & wellbeing resources and volunteering offerings.

3.0 CORPORATE STRUCTURE AND BUSINESS OVERVIEW

3.1 Corporate Governance Overview and Objectives

IGG's day to day business activities expose it to strategic, operational and financial risks. The Board accepts that it cannot place a cap or limit on all of the risks to which the Firm is exposed, however effective risk management ensures that risks, including the risk of failure to achieve objectives and implement strategy and the risk of material financial misstatement or loss, are managed to an acceptable level. The Board, through the Risk and Capital Committee, is ultimately responsible for the implementation of an appropriate risk strategy, defining and communicating the Firm's risk appetite, the establishment and maintenance of effective systems and controls and continued monitoring of adherence to risk management policies.

The Board is supported by Risk Management who are responsible for the execution of the Board's risk strategy, including the management of risk appetite, and for supervising, monitoring and supporting the various Risk and Control functions.

It is the aim of the Risk and Control functions to co-ordinate management and reporting of risk ensuring that risk management is fully integrated into day-to-day activities. The Firm's approach to risk management within the business is set out within the Board approved Risk Appetite Statement and Risk Management Framework.

The business provides periodic feedback to the Risk Function on the adequacy of the risk management processes and standards in relation to their specific business functions, including via the Risk and Control Self-Assessment (RCSA), Front Office Supervision, Incident Management and Stress Testing programs, as well as through the production of key management information (MI).

As part of the Risk Management Framework, the business is subject to independent assurance by internal and external audits. The use of independent compliance monitoring reviews and risk reviews provides additional support to this integrated assurance and review program and ensures that the Firm is effectively identifying, managing and reporting its risks.

Instinet's Global Risk Management Framework is designed to ensure that risks are identified and managed within the Group's risk appetite and capital resources. Regulatory capital is monitored closely and reported formally to senior management on a daily basis.

3.2 Governance and Oversight

Effective risk management requires a clearly defined risk governance structure, including definitive roles and responsibilities for all individuals involved in the risk management process across the Firm. As well as ensuring clarity of responsibility and accountability, the value that such a framework adds to commercial activities is also acknowledged.

The objectives of the clearly defined governance structure are to:

- Satisfy the needs of the business for proper consideration and decision making;
- To provide clear management support and a monitoring framework to add value to the business and identify and control risks;
- To ensure good governance principals are followed including:
 - Clear remits and definitions of responsibility, authority, accountability and lines of report;
 - Provision of appropriate delegated authority;
 - A framework to facilitate effective checks and balances in the management and oversight processes;
- To allow and encourage effective and constructive challenge of the executive;
- To apply best practice governance principals appropriate to the business.

3.3 Corporate Governance Structure

3.3.1 The Board

The Board's roles are:

- 1. Strategy and Management
 - Take responsibility for overall management of the Firm;
 - Define the Firm's risk appetite and tolerances and ensuring that this is embedded throughout all operations;
 - Approve the Firm's long-term objectives and commercial strategy;
 - Approve the annual operating and capital expenditure budgets and any material changes to them;
 - Oversight of all operations and outsourcing arrangements ensuring competent and prudent management, prudent planning, an adequate system of internal controls, adequate accounting and other records, compliance with statutory and regulatory obligations;
 - Review of the management's performance in the light of the Firm's strategy, objectives, business plans and budgets and ensuring that any necessary corrective action is taken;
 - Approve any decision which materially impacts the Firm from any perspective, including, but not limited to, financial, operational, strategic, or reputational;
 - Approve any decision to establish any new business or extend the Firm's activities into new business areas;
 - Approve any decision to cease to operate all or any material part of the business;

2. Structure and Capital

- Approve major changes to the Firm's structure, governance or management;
- Approve any changes to the Firm's regulatory or prudential status;
- Monitor capital and liquidity against defined risk appetite and tolerance;

3. Financial Reporting and Controls

 Approve the ICAAP Report, annual report and the accounts, dividend policy, any significant changes in accounting policies or practices, approval of auditors' reports;

Internal Controls

 Ensure maintenance of a sound system of internal controls and risk management including receiving reports on, and reviewing the effectiveness of, the Firm's risk and control processes to support its strategy and objectives and undertaking an annual assessment of these processes;

Material Commitments

- Approve major capital projects, contracts which are material strategically or by reason of size, market impact etc., major investments, commencement of litigious proceedings and settlement of claims etc.;
- 6. Approve shareholder communication, if any;
- 7. Board Membership and Other Appointments
 - Approve changes to the structure, size and composition of the board;
 - Ensure board considers diversity on the board when making additional appointments;

- Selection of the Chairman and the Chief Executive Officer;
- Approve membership of any board committees;
- Approve continuation in office of any director at any time, including the suspension or termination of service of the executive director as an employee, subject to law and their service agreement;
- Appoint and remove the Company Secretary, Chief Risk Officer (if any), external Auditors;
- Approve appointments to the boards of any subsidiaries;

8. Delegation of Authority

- Set out divisions of responsibility between the Chairman and the Chief Executive Officer (as set out in the roles of responsibility, from time to time amended by the board);
- Approve the terms of reference for any board committees;
- Ensure the board has appropriate management information to oversee performance against financial targets, key risk indicators and key performance indicators;
- Approve the individuals authorised to bind the Firm and set out any conditions to that authorisation;
- Approve any changes to the above;

9. Policies

 Approval of corporate policies and procedures which it would be appropriate for the Board to approve;

The Board also has overall responsibility for the Firm's Risk Management Framework, regulatory compliance and internal control framework and for ensuring that they work effectively.

The Board meets on a quarterly basis with additional meetings as required.

The Board delegates the day to day responsibilities to the executive management team. In addition, there are a number of committees that the board have delegated responsibility to perform certain functions.

3.4 Directorships

The table below shows our directors and their number of both internal and external directorships:

| Director | Internal directorships | External directorships |
|------------------|------------------------|------------------------|
| Hellfried Schram | 1 | 1 |
| Torben Starkey | 1 | 0 |

No directors resigned during the year.

Internal directorships are defined as those within the global Instinet and Nomura groups.

3.5 Risk Management Strategy

To promote integrated risk management, Instinet defines risk appetite as the types and level of risk that Instinet is willing to assume in pursuit of its strategic objectives and business plans, in consideration of the constraints by regulatory capital, liquidity, and business conditions.

The Risk Appetite Statement is owned by the Chief Risk Officer. Risk appetite and the Risk Appetite Statement must be approved by the IGG Board at least annually. Compliance with risk appetite is periodically monitored and reported to the Board and the Senior Management on a regular basis.

Instinet manages risks in accordance with the Group Code of Conduct. All executives and employees of Instinet, irrespective of their function, actively engage in risk management. Staff are required not only comply with rules and regulations but also understand their purpose and the background of their establishment, and manage risks with the highest ethical standards.

3.6 Risk Management Framework

The activity of risk management in Instinet is based on the following principles:

- 1. Risks are identified and assessed to determine their underlying characteristics. Risks are appropriately categorized based on those characteristics and appropriate risk measures and controls are established to manage them.
- 2. Frameworks for monitoring and reporting risks are established in order to restrain risks to the confines of the firm's Risk Appetite.
- An effective risk management framework is maintained through, amongst other
 matters, robust committee governance, the development of an appropriate
 organisational structure and three lines of defence model, and the maintenance
 of relevant policy and framework documentation.

The Risk Appetite, which is determined based on the Instinet's strategic approach to risk management, is articulated within the Risk Appetite Statement as noted above. Instinet evaluates business opportunities and makes day-to-day risk management decisions in accordance with the Risk Appetite Statement.

3.6.1 Risk Governance

An organisational framework and committee structure are in place to facilitate effective business operations and management of the firm's risks.

Instinet uses the Three Lines of defence approach and all executives and employees are aware of their roles and actively engage in the firm's risk management. The role of each line of defence is as follows.

1. The First Line of Defence:

The First Line is responsible for complying with the Risk Appetite Statement, the Firm's policies and procedures, and risk limits set forth therein. In addition to complying with these internal rules, the First Line is accountable for appropriately managing risks in accordance with the Code of Conduct. The First Line must establish its own risk management governance while making appropriate use of the infrastructure, information and analysis provided by the Second Line.

The First Line is primarily responsible for risk management; it is the First Line's responsibility to assume the consequences associated with business execution and to provide evidence and justify that the risk arising from their business activities is in line with risk appetite.

The First Line must monitor whether the nature of the risks has changed from the initial assumptions and manage them appropriately.

2. The Second Line of Defence:

The Second Line establishes a framework to manage risk appropriately. The Second Line uses the framework to monitor whether the business activities by the First Line are in line with the risk appetite and reports to the Board and the senior management. In

addition, the Second Line independently evaluates risk management governance established by the First Line.

The Second Line challenges the First Line by seeking further explanations, asking for changes, or withholding approvals if there are any concerns regarding the appropriateness of the First Line's business plans or individual transactions.

3. The Third Line of Defence

The Third Line examines and evaluates the risk management, control, and governance of the First and Second Lines and advises on improvement. The results of the examination and evaluation are reported to the Board and Instinet Audit Committee.

3.6.2 Risk Monitoring & Reporting

Risk data and management information is developed, aggregated and reported in accordance with the Instinet's Identity and Access Management Policy in order to monitor risk and provide a basis for sound decision-making.

All risks must be subject to detailed monitoring and reporting requirements. These must ensure that the status of risks is captured accurately and reported regularly and in a timely manner to senior management including the relevant Governance Committees and the overarching Risk Committee as well as the Board.

3.6.3 Policies and Procedures

A detailed framework is in place to support effective risk management at Instinet. Policies are established to cover the risk management approach to every major risk category and every major risk management activity.

3.6 Principal Risk Categories

3.7.1 Financial Risks

Market Risk

For Instinet Market Risk is defined as the risk of incurring losses due to a change in the value of assets or liabilities resulting from moving price in interest rates, currency and stocks.

As an agency broker the Group does not take proprietary positions. Therefore, in general and under normal BAU conditions appetite for market risk is low, and the Group is exposed to a limited range of market risks being:

- Position risk arising on any warehoused positions;
- FX position risk arising from holding non-Sterling denominated assets and liabilities:
- Incidental equity positions that arise due to incomplete orders and/or client fails.

Instinet has established a Market Risk Management Framework to identify, analyse, evaluate, monitor and report Market Risk in order to manage Market Risk effectively.

Credit Risk

Credit Risk is defined as the risk of incurring losses when an obligor, counterparty or issuer fails to meet its obligations. Default risk is managed by credit limits and counterparty risk assessments based on the credit rating framework.

Instinet has established a framework to identify, analyse, evaluate, monitor and report Credit Risk in order to manage Credit Risk effectively. In this framework, internal ratings are assigned based on credit analysis in accordance with the Internal Rating System. Credit Exposures from counterparty transactions are managed by means of setting Credit Limits, and Credit Exposures are monitored and managed within the limit.

Liquidity Risk

Liquidity Risk is defined as the risk of loss arising from difficulty in securing the necessary funding or from a significantly higher cost of funding than normal levels due to deterioration of the Instinet's creditworthiness or deterioration in market conditions.

Instinet has established a framework to measure, manage, monitor and report Liquidity Risk in order to manage Liquidity Risk effectively.

3.7.2 Non-Financial Risks

Operational Risk

Operational Risk is defined as the risk of financial loss or non-financial impact arising from inadequate or failed internal processes, people, and systems or from external events. It includes in its definition Compliance, Legal, IT and Cyber Security, Fraud, Third Party and other non-financial risks. It does not include strategic risk and reputational risk; however, some operational risks can lead to reputational issues and as such operational and reputational risks may be closely linked.

Instinet has established a framework to identify, assess, monitor and report on Operational Risk in order to manage Operational Risk effectively. Operational Risk is managed mainly through Risk and Control Self-Assessment, Event Reporting, Key Risk Indicators ("KRIs"), and Scenario Analysis.

Reputational Risk

Reputational Risk is defined as the possible damage to Instinet's reputation and associated risk to earnings, capital or liquidity arising from any association, action or inaction which could be perceived by stakeholders to be inappropriate, unethical or inconsistent with Instinet's values and corporate philosophy.

3.7.3 Other Risks

Strategic Risk

Strategic Risk is defined as the risk to current or anticipated earning, capital, liquidity, enterprise value, or the Instinet's reputation arising from adverse business decisions, poor implementation of business decisions, or lack of responsiveness to change in the industry or external environment.

Strategic Risk for Instinet is owned by the IGG Board, supported by the Senior Management team, who are responsible for recommending strategy to the Board and providing oversight of business activities and the execution against that strategy.

4.0 OWN FUNDS AND MINIMUM OWN FUNDS REQUIREMENTS

4.1 Own Funds

The Firm's own funds at 31 March 2023 are summarized in table 4.1.1 below.

Common Equity Tier 1 Capital

The Firm's regulatory capital consists entirely of CET1 capital, made up of €7.0m of fully paid-up ordinary shares, audited retained earnings and other reserves.

Ordinary shares carry voting rights and are 100% owned by Instinet Europe Limited, incorporated in the United Kingdom. The ultimate parent company is Nomura Holdings, Inc, of Japan.

Capital Deductions

Own funds are subject to the following deductions from CET1:

- Deduction of intangible assets;
- · Deduction of free-of-payment deliveries.

Table 4.1.1 - Own Funds

| Own funds | 31 March 2023 €m | 31 March 2022 €m |
|--|---------------------|---------------------|
| Common equity Tier 1 (CET1) capital instruments | and reserves | |
| Capital Instruments and Related Share Premium Accounts | 7.0 | 7.0 |
| - Ordinary Shares | 7.0 | 7.0 |
| - Share Premium | 0.0 | 0.0 |
| Retained Earnings | 3.6 | 3.0 |
| Other Reserves | 41.5 | 41.5 |
| CET1 Capital before Regulatory Adjustments | 52.1 | 51.5 |
| CET1 Capital Regulatory Adjustments | | 1 |
| Intangible Assets | (1.4) | (1.7) |
| Free of Payment Deliveries Deducted from CET1 | (0.0) | (0.1) |
| CET1 Capital | 50.6 | 49.6 |
| Total Own Funds | 50.6 | 49.6 |

The increase in own funds reflects the inclusion of audited profits for the period ended 31 March 2023.

4.2 Own Funds Requirements

Article 11 of the IFR stipulates that investment firms shall at all times have minimum own funds equivalent to the higher of.

- Permanent Minimum Requirement (PMR) a flat minimum requirement of €750k;
- Fixed Overheads Requirement (FOR) one-quarter of the fixed overhead costs of the previous year. This is an amount used as a proxy for sufficient funds to begin winddown in an orderly way;
- K-Factor Requirement (KFR) the amount of own funds sufficient to cover the risk of harm from the ongoing operation of the Firm's business.

The k-factors are attributed to three risk categories:

RtC: risk to client;

RtM: risk to market;

RtF: risk to firm;

The capital requirement from the K-factor formula is the sum of RtC, RtM & RtF. To capture each of these three components firms are required to use their own metrics (below) multiplied by prescribed K-factors.

| Risk type | K-factor | Co-efficient | Summary |
|--|------------------------------------|--|--|
| | K-AUM (assets under management) | 0.02% | Value of assets that a firm manages for its customers. N/A |
| Risk-to-Customers (RtC): quantification of the potential harm the firm may pose to its customers | K-CMH (client money held) | 0.4% (on segregated accounts) 0.5% (on nonsegregated accounts) | Amount of client money that a firm holds, considering the legal arrangements in relation to asset segregation and irrespective of the national accounting regime applicable to client money. |
| | K-ASA (safeguarded assets) | 0.04% | Value of assets that a firm safeguards and administers for clients, irrespective of whether assets appear on the firm's own balance sheet or third-party accounts. |
| | K-COH (client orders handled) | 0.1% (cash trades) 0.01% (derivatives) | Value of orders that an investment firm handles for clients, through the reception and transmission of client orders and through the execution of orders on behalf of clients. |
| Risk-to-Market (RtM): K-factor | K-NPR (net position risk) | Standardised approach | Position risk charge calculated using |

| | | T | |
|---|--|--|---|
| requirement for trading book positions but this includes other positions where these give rise to FX risk | | (set out in chapters 2,3 and 4 of Title IV of Part Three of Regulation (EU) No 575/2013) | standardised approach. Intercompany positions are eliminated on consolidation. Positions may only be aggregated across Group companies with permission (i.e. NPR positions are additive). |
| | K-CMG (clearing member guarantee) | N/A | This is the amount of the total margin required by a clearing. member or qualifying central counterparty. Requires permission from the FCA: MIFIDPRU 4 Annex 7 |
| | K-TCD (trading counter- party default) | α * (exposure value- collateral) * CVA α = 1.2 Exposure value = Max (0, (RC+PFCE- C)) | Exposure in the trading book of a firm in instruments and transactions giving rise to risk of trading counterparty default. |
| Risk-to-Firm (RtF): quantification of a firm's exposure to the default of its trading partners | K-DTF (daily trading flow) | 0.1% (cash trades) 0.01% (derivatives) | Daily value of transactions that a firm enters through dealing on own account or the execution of orders on behalf of clients in its own name, excluding the value of orders that a firm handles for clients through the reception and transmission of client orders and through the execution of orders on behalf of clients which are already considered in the scope of K-COH. |
| | K-CON | N/A | Exposure in the trading book of a firm to a client or group of connected clients which exceeds the limits in the IFR. |

The following Risk Types and K-Factors are not applicable to the Firm's business model:

- K-AUM: The Firm manages no assets;
- K-ASA: The Firm, although it holds client money, operates no safeguarding accounts;
- K-COH: Client orders are calculated under the K-DTF factor;
- K-CMG: No margin is placed with CCPs;
- K-TCD: The Firm is not exposed to counterparty credit risk;
- K-CON: The Firm has no trading book.

The Firm calculates its minimum own funds requirements on a daily basis in accordance with the requirements set out in Parts Three and Four of the IFR. A summary report, which includes variance analysis and points of note, is distributed widely to key management.

As at 31 March 2023 the Firm's own funds requirements were as follows:

Table 4.2.1 – Minimum Own Funds Requirements

| | 31 March 2023 €m Capital Requirement | 31 March 2022 €m Capital Requirement |
|-------------------------------|---|---|
| Permanent Minimum Requirement | 0.8 | 0.8 |
| Total K-factor Requirement | 2.0 | 2.4 |
| Risk-to-Client (RtC) | 0.0 | 0.0 |
| Risk-to-Market (RtM) | 0.0 | 0.0 |
| Risk-to-Firm (RtF) | 2.0 | 2.3 |
| Fixed Overheads Requirement | 7.5 | 9.3 |
| Own Funds Requirement | 7.5 | 9.3 |

The Firm is required, at all times, to satisfy the following minimum own funds requirements:

- Common Equity Tier 1 capital ratio ≥ 56%;
- Tier 1 capital ratio ≥ 75%; and
- Total capital ratio ≥ 100%.

The Firm's capital ratios as at 31 March 2023 and 31 March 2022 are summarised below:

Table 4.2.2 - Capital Ratios

| | 31 March 2023 % | 31 March 2022 % |
|--|--------------------|--------------------|
| Risk-Based Capital Ratios – Own Fund as a P Requirement | ercentage of Minir | num Own Funds |
| Common Equity Tier 1 Capital Ratio pre- adjustments | 694.5% | 553.1% |
| Tier 1 Capital Ratio | 675.2% | 532.9% |
| Total Capital Ratio | 675.2% | 532.9% |

Additionally, the Firm undertakes an assessment of the financial impact of any harm that is not covered by its PMR, FOR or KFR in determining its Total Own Funds Requirement in its annual Internal Capital Adequacy Assessment Process.

5.0 THE INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (ICAAP)

In addition to the minimum own funds' requirements, calculated under the requirements of the IFR, the Board assesses whether IGG needs to hold further capital to mitigate other potential harms that may arise in relation to its activities. This includes an assessment of how a severe but plausible economic or idiosyncratic stress could affect its ability to meet its capital requirement.

IGG uses plausible hypothetical scenarios to identify and assess whether any additional capital is required to support its current and future activities, in accordance with article 50 of the IFR. These scenarios are also used to establish any requirement to hold additional own funds should non-business-as-usual (non-BAU) scenarios result in the regulatory capital and liquidity requirements being over and above the minimum calculated.

Further, as well as assessing the adequacy of capital held against the risks to which the Firm is exposed, IGG also considers actions that management would take under these scenarios to mitigate the need for any additional capital and liquid assets holdings.

The ICAAP is reviewed and approved by the Board at least annually. It is a live document consequently, if significant business changes occur between annual review dates, the ICAAP is amended and resubmitted for review and approval.

6.0 REMUNERATION DISCLOSURE

IGG does not benefit from the derogations laid down in Article 32(4) of the Investment Firms Directive (Directive (EU) 2019/2034 (IFD)) and, consequently, is subject to the disclosure requirements set out in Article 51 of the IFR.

6.1 Remuneration Policy and Process

For the period ending 31 March 2023, IGG's remuneration policies and processes were subject to the oversight of the Remuneration Committee established by its immediate parent, Instinet Europe Limited. This committee comprises of the Global Head of Human Resources, the Non-Executive Chairman and two Non-Executive Directors. The duties, as documented in the Terms of Reference of the Remuneration Committee (the "Committee"), are set out below.

- The Committee shall determine and agree with the Board the framework or broad policy for the remuneration of the Firm's employees (the "Remuneration Policy"). No director or manager shall be involved in any decisions as regards to their own remuneration;
- In determining the Remuneration Policy, the Committee shall take into account all factors which it deems necessary, including, but without limitation, its regulatory obligations as an entity regulated by the BaFin and appropriate incentives to encourage enhanced performance;
- The Committee shall review the ongoing appropriateness and relevance of the Remuneration Policy;
- The Committee shall:
 - a. Review and note annually the remuneration trends across the Firm; and
 - b. Oversee any major changes in employee benefit structures throughout the company.
- The Committee shall obtain reliable, up to date market information about remuneration. The Committee shall have full authority to commission any reports or surveys which it deems necessary to help it fulfil its obligations;
- The Committee shall consider such other matters as may be requested by the Board.

6.2 Relevant Staff

Remuneration disclosures cover relevant staff as defined by Article 30(1) of the IFD:

"categories of staff, including senior management, risk takers, staff engaged in control functions and any employees receiving overall remuneration equal to at least the lowest remuneration received by senior management or risk takers, whose professional activities have a material impact on the risk profile of the investment firm"

Material risk takers are identified on both qualitative and quantitative criteria with reference to EBA Regulatory Technical Standards.

6.3 Link Between Pay and Performance for Relevant Staff

Remuneration for employees is made up of fixed pay (i.e. salary and benefits) and performance-related pay based on individual, Firm and Group performance. The variable bonus pool is set by the Firm's immediate parent company in consultation with its ultimate parent company. Instinet Europe's senior management team proposes individual allocation based on, inter alia, appraisals. The appraisal takes into account consideration of regulatory compliance and risk behaviour. Proposals are then submitted to the Committee for approval. Bonuses are completely discretionary, so the structure of the remuneration package is such that the Firm can operate a truly flexible bonus policy.

Employees engaged in risk and control functions are independent of the business units they oversee. Their remuneration, both fixed and variable, is determined centrally with no involvement from the front-line business.

6.4 Remuneration disclosure

For the Performance Period to 31 March 2023, the aggregate total compensation paid to all IGG's 16 staff and two Management Board members was €3.9m.

| | IGG Remuneration €'000 |
|---|---------------------------|
| Number of Employees (incl. two board members) | 18 |
| Total Remuneration (of which) | 3,904 |
| Fixed | 3,316 |
| Variable | 588 |
| Deferred Remuneration Awarded for Previous Periods | 74 |
| Vesting in the financial year | N/A |
| Amounts Vesting Reduced through Performance Adjustments | N/A |
| Vesting in the Subsequent Financial Years | N/A |
| Severance Payments | 0 |
| Awarded in Previous Periods | N/A |
| Awarded During the Financial Year | N/A |
| Paid Upfront | N/A |

| Deferred | N/A |
|-------------------------|-----|
| Number of Beneficiaries | N/A |
| Highest Single Payment | N/A |

7.0 INVESTMENT POLICY

IGG does not take proprietary positions and, therefore, holds no shares, either directly or indirectly, in companies whose shares are admitted to trading on a regulated market. Consequently, the disclosure requirements under Article 52 of the IFR are not applicable to the Firm.

8.0 ENVIRONMENTAL, SOCIAL AND GOVERNANCE RISKS

Environmental, social and governance (ESG) risks are risks of any negative financial impact stemming from the current or prospective impacts of ESG factors on counterparties or invested assets or on the solvency of an entity.

ESG disclosures cover the following:

8.1 Environmental Matters

The Board considers the potential for a negative financial impact from current or prospective (climate related) environmental factors on counterparties or invested assets.

- Physical Risk: Climate change indicates more frequent or severe weather disasters such as flooding, droughts and storms that bring 'physical risks'. The Firm however, has minimal banking book exposures, with the exception of settlement positions, consequently it is not invested in assets in sectors or geographies subject to chronic or acute climate related hazard;
- Transition Risk: The risk attributed to the cost of shifting values and asset prices
 when moving towards a less polluting, greener economy. As the Firm is not invested
 in any medium- of long- term assets its risk of exposure to counterparties negatively
 impacted by transition to a low carbon economy due to government policy, behavioural
 (consumer preference) or technological changes is minimal e.g. IGG has no
 exposures to carbon intensive firms on its balance sheet;
- **Liability Risk:** The Board does not consider the Firm to be at risk from the threat of litigation from parties who could suffer loss or damage from climate change.

8.2 Social and Employee Aspects

IGG believes that it has a responsibility to ensure that its business is conducted in an ethical way and it actively addresses social issues. As part of this process, a Modern Slavery and Human Trafficking Standard (the "MSA Policy") is in place, which seeks to identify and manage slavery and human trafficking risk in our business and supply chains. In addition, IGG is subject to the Nomura Corporate Social Responsibility and Code of Ethics Policy.

The Board considers the potential negative financial impacts of a failure to address social issues on:

- Hiring and recruiting;
- Professional development (career management and employability, remuneration system and training);

• Diversity and inclusion (its diversity strategy addresses equal treatment in employment and occupation including age, gender, sexual orientation, religion, disability, ethnic origin and other relevant aspects).

8.3 Governance

IGG, and its wider group, are continually considering how the integration of the effects of ESG factors and risks, in both governance arrangements and in the risk appetite framework, should be further addressed.

ESG factors, amongst others, are considered when reviewing:

- Corporate governance policies, frameworks and codes;
- Privacy and data security policies;
- The criteria applied when selecting directors;

Additionally, IGG takes all reasonable and necessary steps in the prevention of Financial Crime risks affecting the Firm, its clients, and the wider market by implementing controls relating to bribery, corruption, fraud, money laundering, terrorist financing, tax evasion and/or the contravention of financial Sanction law.

8.4 Qualitative and quantitative disclosure templates

Both qualitative and quantitative ESG disclosures will be mandatory for class 2 investment firms for accounting periods commencing 22 December 2022 (Article 35 IFD). The EBA has published draft ITS on Pillar 3 disclosures on ESG risks, however these disclosures have been designed to apply to, and will only be mandated for, large institutions that have issued instruments traded on regulated markets, a population that does not include IGG.
